NEW PRODUCT: Actimove® TaloStep

Slim-Fit Ankle Orthosis designed for the way life moves.

Imagine how many steps a person makes in a day. Walking to the car. Getting around the office. Keeping up with a child. Some reports indicate the average person takes nearly 5000 steps each day.

Actimove® TaloStep is designed to help patients keep pace with their lives. From the anatomical shell forms for proper positioning and support, and the patent-pending strapping system to the slim, low-profile fit and breathable, non-neoprene material, Actimove® TaloStep is there to offer comfort and security every step of the way, every day:
